Tarantula from Costa Rica

Talks

Using my own photographs I will take you on a trip through some of the most amazing rain forests of the world.

Over the last 15 yrs I have traveled through the rain forests of Borneo, India, Sri Lanka and the mighty Amazon searching for Tarantulas, photographing and studying their habitats.

During these trips many new species have been discovered and how they live revealed

I can also bring along live specimens for you to see.

Children's Parties

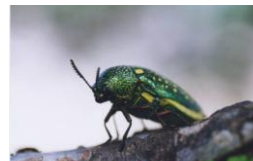

Have a party with a difference.

I will take the children from the forest floor up into the canopy.

Starting with the creatures that live in the leaf litter and then moving into the trees to meet the leaf eaters and their predators.

Beetles, Spiders, Snakes, Millipedes, Stick insects and Praying mantis are just some of the creatures I will bring to the party.

The children will see how these creatures live and survive in the rain forest

Jewel Beetle from India

Events

Fetes, Fairs, Open days

I will bring along a variety of creatures for your visitors to ask questions about.

They will be amazed by the different animals of the rain forest I will have on display

Children's parties last for 1 hour. Children are allowed to touch but not to hold the animals.

Talks suitable for Schools, Colleges, Societies, Cubs, Scouts, Beavers, Guides, Brownies, Libraries etc.

Animals and insects used are mostly captive bred by Life in the Rainforest.
